☐ Lambda Function

6. What is the correct way to create an ArrayList in Kotlin?

☐ `val map = hashMapOf(1 to "one", 2 to "two", 3 to "three")`

☐ `enum class Color {RED, GREEN, BLUE}`

☐ `val set = hashSetOf(1, 2, 3)`

☒ `val list = arrayListOf(1, 2, 3)` Correct!

A screenshot of a web browser displaying a quiz result on the Android Developer website. The browser's address bar shows the URL: developer.android.com/courses/quizzes/android-development-with-kotlin-2/android-development-with-kotlin-2?continue=https%3A%2F%2Fdeveloper.android.com%2Fcou... The page header includes the Android Developers logo and navigation links: Essentials, Design & Plan, Develop, Google Play, and Community. A search bar and language selector (English) are also present. The quiz question is "A lambda is a ...", and the correct answer is "A lambda is an expression that describes a function. But instead of declaring a named function, you declare a function that has no name". The user has scored 5 out of 5. A Google account overlay is visible on the right side of the screen, showing the user's profile picture, name "Hi, Sathvika!", and options to "Manage your Google Account", "Switch account", or "Sign out".
